

Digital Retinal Exam

In our continued efforts to bring the most advanced technology available to our patients, Frutchey Eye Care is proud to announce the addition of the Canon Digital Retinal Exam as an integral part of your eye examination today.

As doctors, we are concerned about retinal problems including macular degeneration, glaucoma, retinal holes or detachments and systemic diseases such as diabetes, stroke and high blood pressure. These conditions can lead to serious health problems including partial loss of vision or blindness and often develop without warning and progress with no symptoms.

A Digital Retinal Exam provides:

- An eye wellness scan.
- An in depth view of the retinal layers (where disease can start).
- The ability of you to view your retinal image with your doctor during your exam.
- An annual, permanent record for your medical file, which gives your doctor comparisons for tracking and diagnosing potential eye disease.

The Digital Retinal Exam is fast, easy and comfortable.

Insurance typically does not cover any advance screening technology beyond the general eye examination. Your Doctor highly recommends the Digital Retinal Exam for all patients.

YES I would **LIKE** to have the Digital Retinal Exam for an additional \$25.00

NO I would **NOT** like to have the Digital Retinal Exam at this time.
